

Sentry Switched CDU

CW-48V5 Mixed Outlets, 240V/415V

High-Density Power Distribution

The CW-48V5 Switched Cabinet Distribution Unit (CDU) provides reliable power distribution for high density applications such as blade server clusters that require 3-Phase, 20-Amp, 30-Amp power. The Switched CDU provides reliable power distribution combined with local and remote power monitoring and environmental monitoring via IP. Use the network interface to view power, temperature and humidity levels via Web browser, or receive SNMP-based alarms and email alerts when conditions exceed defined thresholds. It utilizes PIPS - Per Inlet Power Sensing - technology for 1% measurement accuracy on power and current measurements.

This switched CDU has network, serial & environmental connections located in the middle of the unit with a top power cord entry. Current displays are easily inverted via the web GUI or serial interface. These features provide flexibility whether the CDU is connected to overhead busway or under floor power.

Additional Benefits:

Branch Circuit Protection

The Sentry CDU Family meets the UL 60950-1 requirement for branch circuit protection.

- UL 489 rated circuit breakers

PIPS - Per Input Power Sensing

Accurately measures Active Power, Apparent Power, Energy k-Wh, Power Capacity, Reactance, and Power Capacity Used using the network interface. See the aggregate current draw, in Amps, locally using the onboard LED.

Temperature and Humidity

The Switched CDU supports two external probes. Each of these probes measure both temperature and humidity. Receive SNMP-based alert notifications when conditions exceed defined thresholds.

Linking for Switched CDU (Expansion Modules)

The Switched CDU family has the capability to daisy chain units together. The Expansion Module provides the ability to link two power circuits under one IP address.

Key Features

- > Remote Power Management: Power cycle individual power outlets, or groups of power outlets, to remotely reboot servers and network devices, anywhere in the world. Or, power-off unused power receptacles
- > High Power Distribution: 240/415V 3-phase, 20A or 30A power input feeds
- > High Density: Single power input feed; (36) IEC C13 and (12) IEC C19 outlets per enclosure
- > IP Access & Security: Web interface, SSL, SSH, Telnet, SNMP, FTP, SNT, Syslog, RADIUS, LDAP, LDAPS, TACACS and RS-232 access
- > Add an Expansion Module: Connect the Switched Expansion CDU (CX) to a Master unit (CW) for power management of separate power circuits from a single IP address
- > Environmental Monitoring: Each Switched CDU supports two temperature & humidity probes and reports conditions thru the user interface without the need for additional IP addresses
- > SNMP Traps: Provide automated alerts for power and environmental conditions
- > Input Current Monitor: Precisely measure the aggregate current draw (in amps) on each phase. On-site verification of the input current with the LED digital display. Remote verification via browser or serial screen.
- > Power-up Sequencing: Prevent an in-rush power overload
