

**During your evaluation of this Server Technology Sentry CDU(s), the following are a few key features to consider:**

#### **C-xxHF Series Fail-Safe Transfer Switch**

- Dual input power source design. Both input feeds used under normal conditions, thereby reducing relay contact wear during switching. This design does not prohibit load-balancing between circuits during normal operation.
- Phase synchronization not required. Seamless transfer to attached equipment.
- Patented arc-suppression
- True RMS input current monitor(s) on easy-to-read local LED indicates load and ON/OFF status of sources
- Branch Circuit Protection – meetings UL 60950-1
- Fully redundant power
