

## CDU Installation

## Sentry® Smart or Switched

### 1.0 Executive Summary

In today's do more with less work environment, often there are no resources available for installation of the Cabinet Power Distribution Units (CDU's) within your facility. This is especially true in a large build out or an installation where cabinets are preconfigured to ensure future availability. Out sourcing this task to a trained technician ensures that the CDU's are installed and tested properly providing reliable operation.

### 2.0 Features and Benefits

Features	Benefits
Site Walk Through	A review of the installation with customer to ensures optimal design and mounting configuration.
Inventory and Unpacking	Ensures that the proper equipment was received and that it is being installed in the proper cabinet
Mounting and Installation	CDU installation carried out per the agreed configuration
Testing	Provides verification that all configuration operations that were performed are working correctly.
Training	Only through proper training can you be assured that you are getting the maximum value from your Cabinet Power Distribution Units (CDU's).
